**LIBYAN GATE LLC COMMENCES  
OPERATIONS IN TRIPOLI**

The Charles Kendall Group are pleased to announce the formation of Libyan Gate LLC, a limited liability company based in Tripoli Libya. Since its inception in 1946, the Charles Kendall Group have transported a complete range of consignments across the world including hazardous, time sensitive and military freight, as well as project and exhibition cargoes. As one of the foremost providers of logistics solutions in Europe, Middle East and Asia, the Charles Kendall Group can now provide full support services in this fast expanding North African market.

Awareness of the economic role Libya will play as a major trade gateway to the African Continent has lead to an increase in infrastructure projects that require specialised freight handling services by air, sea and road. Managed by Hakim Temumen, a Libyan national with vast local and international experience, Libyan Gate LLC aims to be the leading specialised freight management company in the region. This important new development is viewed as a major progression and reinforces the group's commitment to maintaining the needs and requirements of an expanding client base.

Additionally through its exhibition freight handling company Show Carriage Limited, Libyan Gate LLC will be providing customs clearance and delivery services, as well as on-site handling, installation and supervision at all major international exhibitions being staged in Libya. Mark Kendall, Group Operations Director commented that this newly created and highly motivated operation will enhance service to our existing clients and be an excellent resource for future customers transporting exhibits to and from Libya.
