

Charles Kendall Packing

Charles Kendall Packing operates from three sites across the country - London Heathrow, Manchester and Southampton. We offer a full range of packing services from customised case-making to on-site packing.

Specialist packing services

Charles Kendall Packing forms part of Charles Kendall Group's seamless, end-to-end supply chain management solutions. We provide a full range of services including:

- Case-making
- Warehousing & Consolidation
- Hazardous Cargo
- Vacuum packing for protection against moisture during long-term storage or environments or countries with high humidity
- Fine Art & Antiques
- Project Management & Consultancy
- Insurance

We have decades of experience in packing a range of cargos from hazardous materials to sports cars, plant weighing hundreds of tonnes and priceless paintings.

Cases are built to customer specifications across all three sites using ISPM15 timber. Our combined facilities include over 60,000 square feet of warehousing space with North and South coverage.

Our Heathrow site was granted Authorised Economic Operator (AEO) status in August 2014 and also includes a 10-tonne overhead gantry crane, as well as container loading facilities and 3, 4, 5 and 10 tonne forklifts available

As well as the packing itself, we can provide expert consultancy on all aspects of packing, insurance and international regulations, as well as help with project management.
