

Procurement Overview

Tailored procurement

Since we were first appointed as a procurement agent in 1949, the world has become a very different place. Over the last 60 years and more, we've continually adapted and innovated to meet the changing needs of our clients.

We buy goods and services, and recruit staff, for government ministries worldwide. As your procurement partner, we look not only to secure a keen price, but also to deliver high standards of quality, service, transparency and integrity.

We tender and source on world markets to deliver what you need, when you need it, for the right price. We also monitor supply contracts through to delivery, controlling specification, tendering, contracting, packing, shipment, clearance, accounting, payment and reporting. And we'll tailor our solution to dovetail with your own operating procedures and requirements.

As experts in our field, we offer a rare depth of experience, and specialist knowledge of the different tendering rules used by governments and agencies worldwide, as well as regulatory and legislative issues across the world.

More than price

We understand that quality procurement is about more than price. It's about delivering exceptional value, and first-class standards of service, as well as independence and transparency.

We only ever work on behalf of buyers – never suppliers, so you can have confidence in our impartial commitment to securing the best resources, and the best value. As part of the global Charles Kendall Group, we can deliver bespoke, expert, and reliable end-to-end supply chain solutions.

From procurement to packing, logistics, transportation and delivery, anywhere in the world.
